The life of science is one of irrefutable truths and a respect for nature. Gardening knowledge, as well as an insight to fishing, will take one far at the Science Facility. It also doesn't hurt to be willing to tinker... even at the risk of electrocution.

For a brief while, I moved Leia out to play with her alone because I was overwhelmed with the amount of sims in that house. She moves back in though because it didn't really work for me. Anyways, her first order of business was getting a job in the science career!

Going into the graduation ceremony with style!

Congratulations! Leia has graduated from Community High School with Highest Honor! Her classmates have voted her Class Clown. The future is bright for this young graduate!
Diplomas and awards can be found in Leia's inventory.
Joe MacDuff

She was voted class clown?? Oh it's because she has the good sense of humor trair. That also explains the hat I guess lol

And she did it!

Gave her a little makeover - inspired by her namesake. And she's also focusing on increasing her fairy powers

Here is the reason why I decided to not move Leia out 😭

Man this was so hard... Karen was such an icon for me. The founder of this legacy and a badass. RIP we'll miss you Kare

Grim Reaper stood at this corner under the rain and stared into the distance. I feel you buddy. It's exactly how I feel about losing Karen

Everyone is heartbroken in the house

Here is Matt, trying to cope with the loss with some meditation. And Foggy joining him

Elodie with a mournful melody

And stuffing her face with hotdogs I guess lol

I cannot live without a dance club in town so Ijust plopped this one I made years ago for twinbrook here. Sent Leia here in hopes of getting her fun need up which is struggling to say the least

Elodie won the contest but at what cost??

Oh my - that is a hot specimen! He's Gladstan Farmwell apparently and ofc he has commitment issues because that is my fucking type lol

The household tries to give enough attention to Foggy

While Elodie is giving a concert at the dog park lol

Leia with all her trophies. I don't even remember why I took this pic lol

Leia interacting with the household. I'm also trying to tech Relay some necessary skills like cooking

Foggy was getting old and I was not having that so I gave him a young again potion and he's back to being a young boy!

Luke and Leia having breakfast. They don't seem to have a lot in common

Both Matt and Elodie wanted to visit the cemetery. These are all the graves of Sunset Valley sims. The big ones are Hank and Karen. The little ones on the ground next to theirs are Thornton and Morgana Wolff's

1/2
Matt has seen many incredible things: cascading underground waterfalls, jewels the size of babies, and partially decomposed, living dead monsters. It's fun, assuming Matt can outrun the fastest monsters.

Elodie just passed a rock outcropping that truly resembled the face of a llama. Elodie paused briefly to enjoy the natural spectacle, then continued onwards to search for riches.

Then they both wanted to explore the mausoleum

oh lmao I didn't know Luke was also here on a Field Trip. It's a whole family outing I guess xD

Your Sim is exhausted from exploring the catacombs and wants to sit down on an inviting slab of stone that is hanging precariously over a ledge.
Continue Onwards
Sit Down

I think this is about Matt. I think he should sit down no need to push himself

Yikes! The catacombs below are filled with horrible monsters, just like the ones described in fairy tales written for mean children! Matt saw truly horrible things. It's unfortunate other Sims won't believe the story.
Horrified
Terrible things have been seen underneath the mausoleum. Explorers beware.

Looking good Matt!

Elodie fell for about 200 meters and landed on a incredibly deep stack of straw, then bounced into a stagnant pool of water. Luckily, the algae growing in the pond was soft and it broke Elodie's fall.
Eat at Restaurant.

I'm not sure now, maybe that question was about Elodie

Luke had a great time!

Elodie should have paid closer attention to the growls emanating from the depths of the catacombs, as the sounds materialized as gigantic, Sim-eating bears! It will take some time for Elodie to recover from this ursine encounter.
Mauled By Bear
It seems bears don't like it when others explore their catacombs. The emotional scars, not to mention the huge physical scars, are not easily forgotten.

His parents... not so much lol Both Elodie and Matt came back singed

Foggy having fun. This takes me back to the days where he would run after the ball at the beach with Elodie. I don't like Moonlight Falls. Other than Bridgeport and Sunset Valley, I couldn't find a world I loved playing. Maybe Twinbrook but it's not on the same level as those two.

Have I ever told you how much I hate the professional sports career? Matt never has any free time. I should have made him a firefighter

Congratulations! Leia's impressive performance has earned her a promotion to Lab Tech, as well as a bonus of §528!
Your commitment to the less than glamorous side of science has garnered you a position as a Lab Tech. It's time to earn that lab coat and broaden your horizons. Beware of flammable materials, radioactive mutagens, and self-aware robotics as you progress deeper into the workings of the laboratory.
Leia now makes §53 per hour and works from 9:00 to 14:30.

Meanwhile Leia earned a promotion. I feel like even though we have started her generation, I'm not paying enough attention to it. I mean look at those moodlets for Matt. He managed to catch fleas from Foggy lol

I sent Leia to the club for some reason I don't remember. Most likely to increase her fun and maybe let her meet new people and we found I think Waylon Wolff turn into a werewolf instead lol

Oh hey Gladsten is here again and Leia wants to make a move!!

To gain his favour Leia bestowed the blessing of the Fae to him

A little flirting

And she took her shot!

Oh he accepted it, yay

Oh I forgot to mention that I moved their houses! This is a house that I used once for 4 generations of sims. It belongs to the Cooks in Bridgeport but I have it saved in my bin

They are still so in love with each other. It's lovely to see

I don't know what this is but saw a witch having fun in there lol

Luke got into the hotdog contest this time

Leia and Matt wanted to launch fireworks to celebrate Leisure Day

I just saw a witch curse this ism randomly lol I don't even know what happened. I had never seen it before lol

How is he able to sleep while the music is blasting right behind him, I don't know

This is Alisha Ursine! She is Leona and Nawwaf Langerak's daughter and friends with Luke. So I gave her a makeover

And she happens to be at the bar where Luke went to blow off some steam

Aww instant chemistry

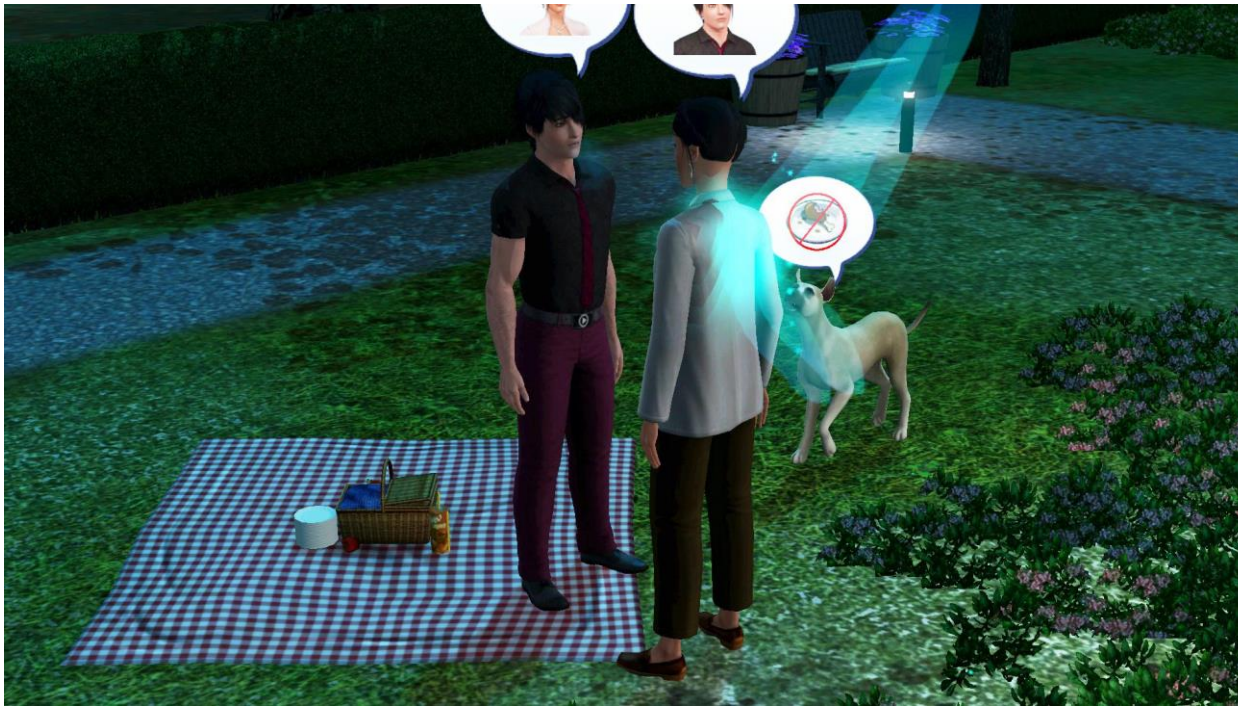
Matt got a promotion though I don't think he's gonna make it to the top of this career before he becomes an elder and I find it a bit ridiculous to be in this job as an elder lol

Luke has the artistic trait and he ocasionally likes to paint. I kinda like this painting

Leia had a wish to visit this place for days now and I finally got around to sending her here in hopes that she'll gain some fun



The Ursines were here and she met Keith Ursine.

He already had a emo haircut and hot pink as a favourite colour so I gave him an appropriate makeover

They were attracted to each other but Keith decided the best way to get Leia was by berating her ignorance

So she played a little revenge prank on him

Congratulations! Leia's impressive performance has earned her a promotion to Useless Contraption Manipulator, as well as a bonus of §636!
Not all departments of the science lab are profitable, or productive for that matter. Nevertheless, for every hundred duds and worthless whiz-bangs there's a hit that rocks the science community to its beaker encrusted core. She got another promotion but her love life really is in shambles

If you don't count Chauncey Grimm giving her roses xD

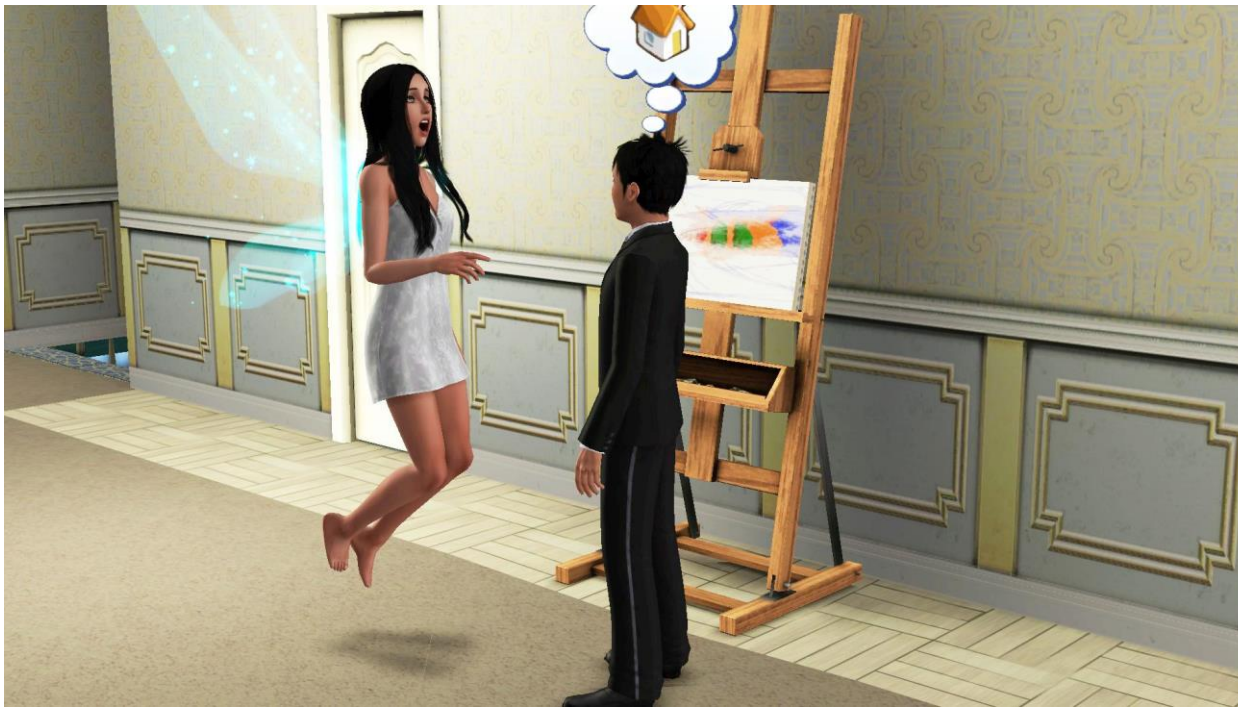
Oh look who is here! Dante Morghante. He was the husband of a sim I played in this town back when I got Supernatural for the first time. She was also a fairy!

So it is time for Matt to grow up! I played with aging off a little to see if I could get Matt to the top of his career but it was taking way too long. I mean he already completed his LTW. His generation is complete and it's time to move on

It's still so hard to let these sims grow old. I get so attached to them

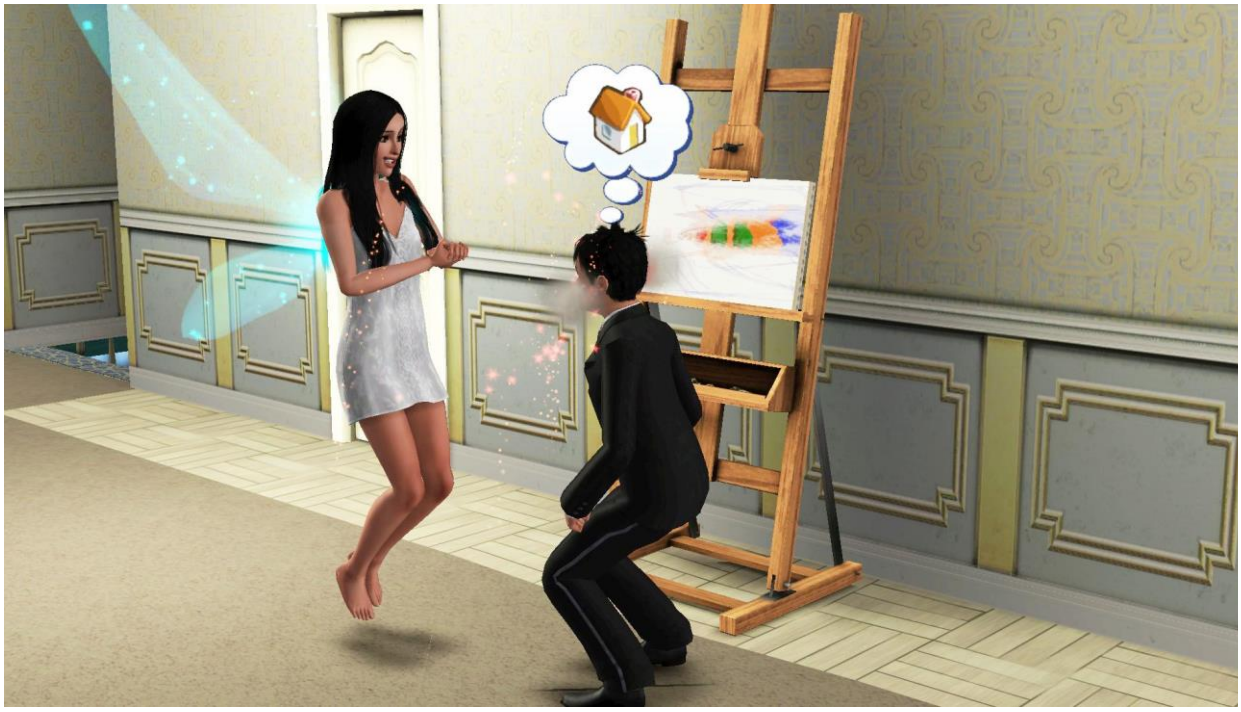
I can't remember why I took this picture or what is happening here

I think I don't really like Luke. Here he is berating Leia's ignorance. What is it with these men constantly putting down Leia - who is a literal scientist??



- Oh Luke
- What?

- Look up here - got a surprise for you!
- Where???



- Get fucked, idiot!

- What the fuck, Leia??

Shh, you deserved that. I love how she rolls to play a prank everytime someone annoys her

A single day later, it is time for Elodie's birthday party!

And there goes my baby, growing up to be an elder 😭

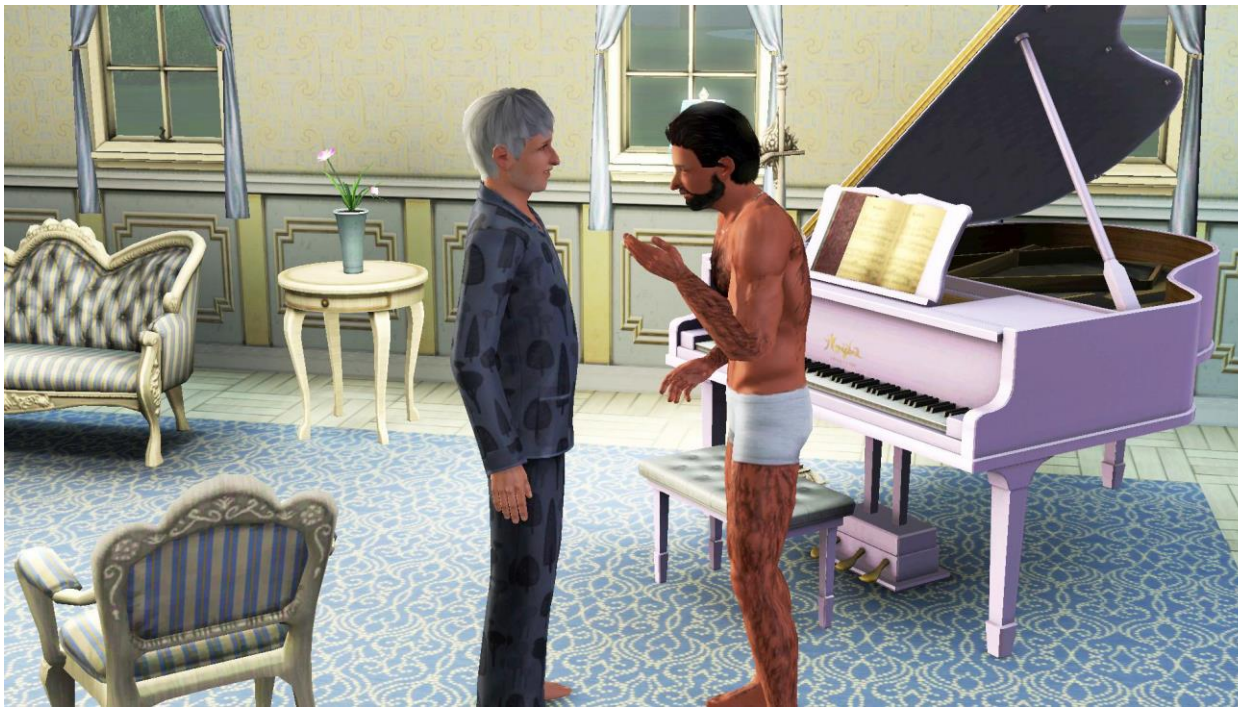
I think this is Haley Sumari and Dante hitting it off. I guess he's out of candidates to be Leia's partner

Relay is at lvl 9 of cooking and she is now busy learning mixology. People were freaking out when they first saw her in this town but they got used to it lol

Oh that's cute, Gladsten and Matt are getting along

Nothing has really changed for these two. I love to see it

Leia asked Gladsten to stay over and he decided it was a good idea to wake her up at 4 am with a little piano tune



Matt and Gladsten are getting along so well

I was checking their panels and noticed Leia's boss is Leona! It's so cool that her parent's friend, who they went uni with ended up being her boss and that Leia followed her path. Maybe Leona effected her a bit

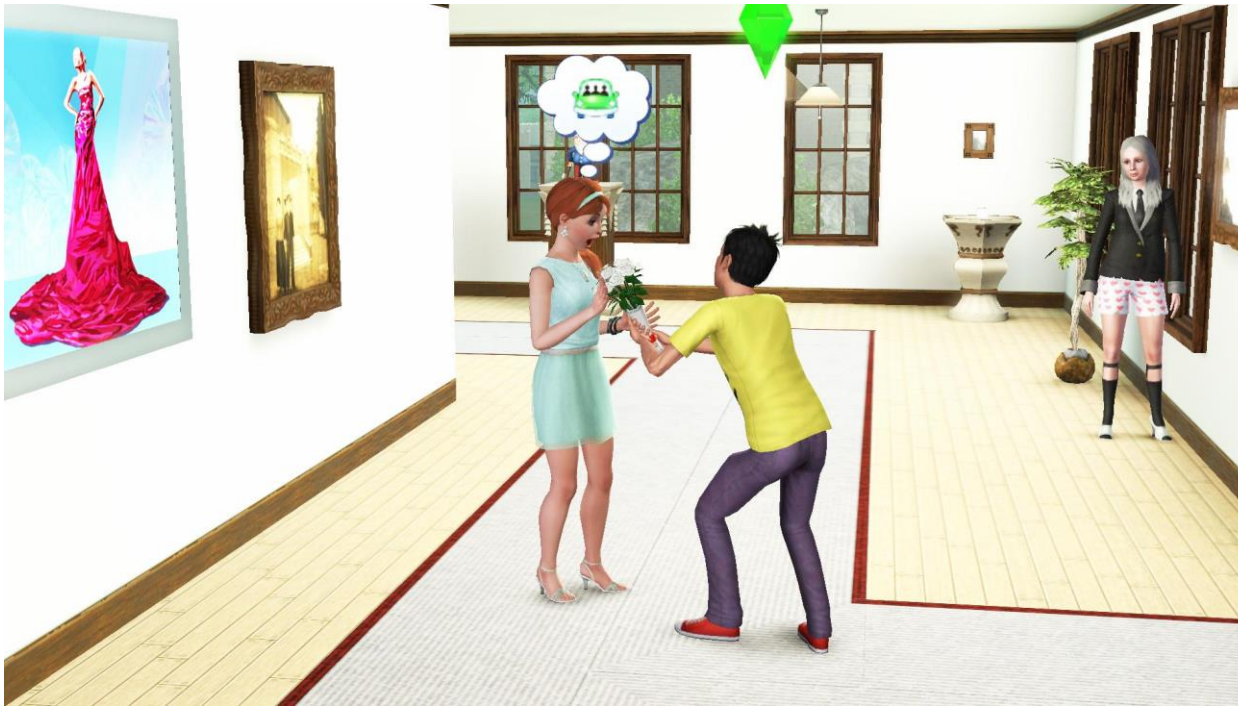
Leia has unlocked some gags that will make Sims gag. She can now Fairy Trap a trashcan and perform Tummy Twister on unsuspecting Sims.

You could tell from Leia dancing alone that she wasn't really getting anywhere with Gladsten so it's time to try someone else

Everything was going so well until this kiss

Leia turned to leave to go home and Dante telepathically learned about her relationship with Gladsten and accused her of cheating. How in the absolute fuck????



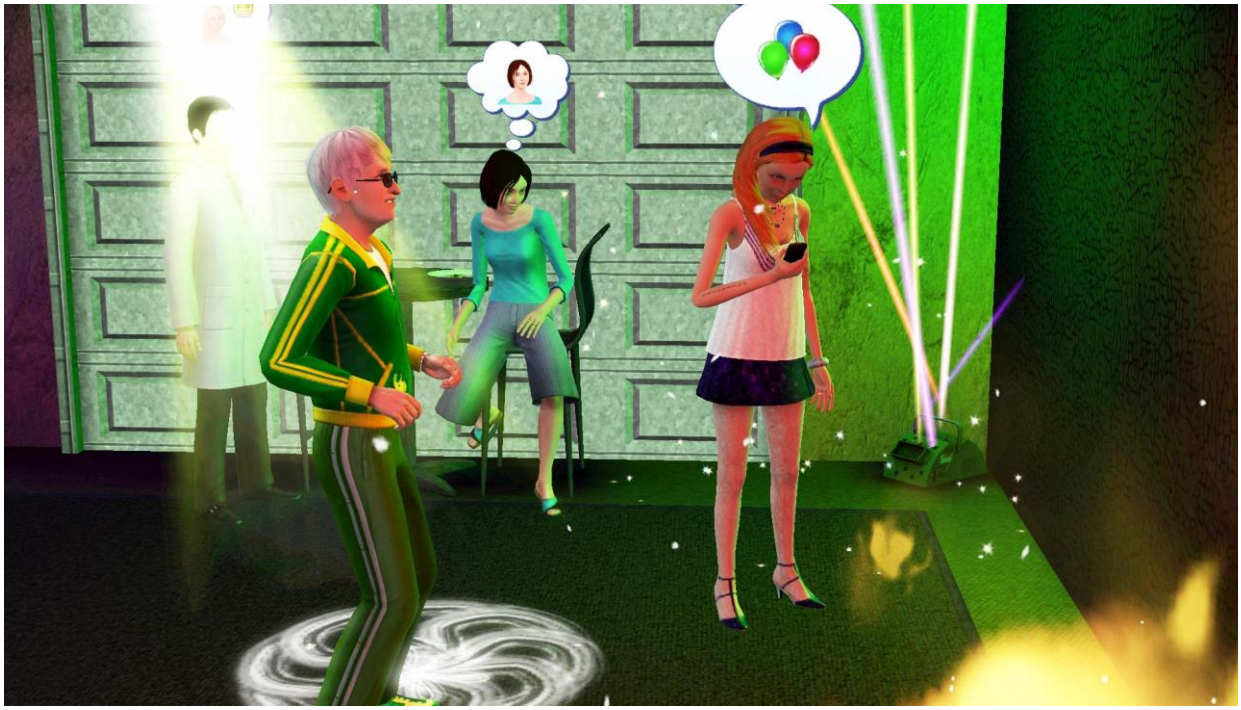
We move on to someone who's lovelife is not in complete shambles

I love that between the two of them, Luke is the one that looks like a townie more xD

Back to Leia's quite frankly depressing love life. Apparently Gladsten was very old. Old enough to be the same age as her father apparently as he just turned into an elder and Leia is a fairy. She's gonna live a long time. It's best I feel that they end this here and stop Dante from accusing her of cheating again

Lucky for her, he has commitment issues and he really doesn't care

Leia is pretty smitten with Dante. She constantly throws wishes to date him so when they bump into each other at the pub, she tries to talk to him but it's not really working



While Leia was trying to pick up the pieces of her pathetic love life, these guys are having the time of their own

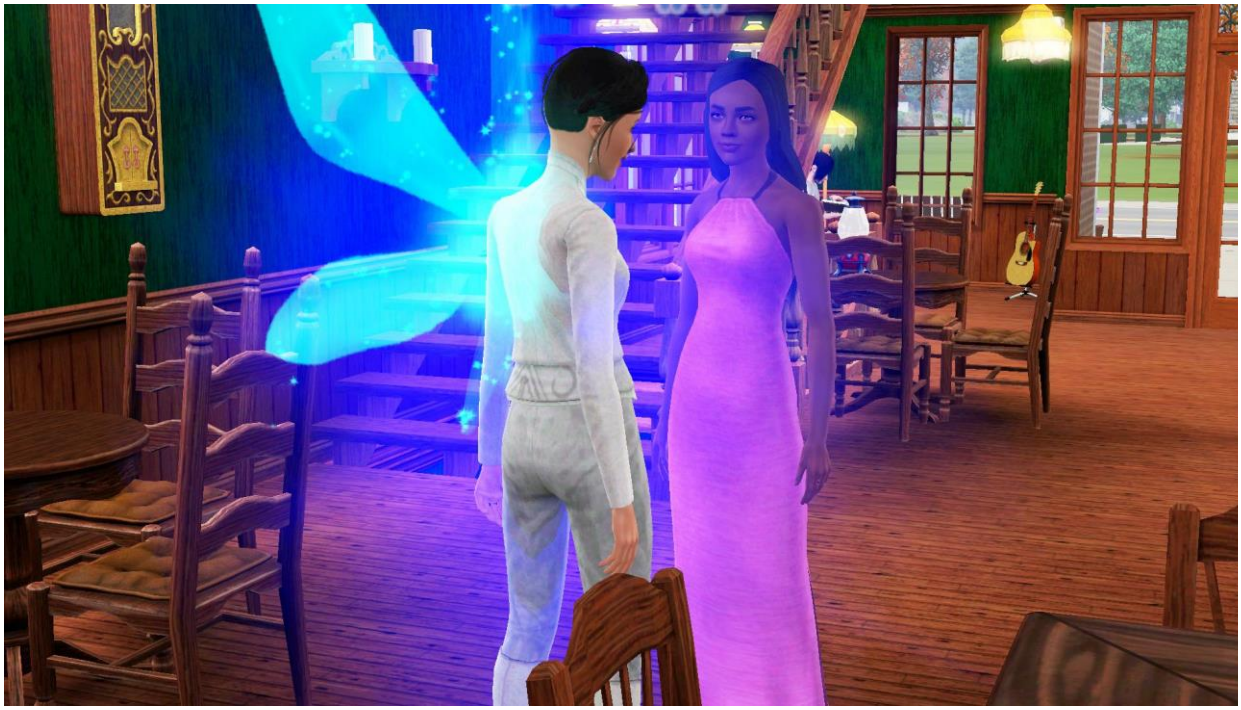
Leia decided to drown her sorrows by cheating on the claw machine after that



Gah she's so cuute

Oh my god these people. Why is everyone picking a fight with my poor heir???

Buried beneath the earth lies a dormant seed that yearns to grow. After searching deep within herself, Lexa has discovered how to coax a plant to fruition by using Bloom.

Well at least she can finally use the bloom ability now. That aura of soothing is doing nothing tho

And now Dante came over to argue with her 🤦‍♀️

I'm done with him. Just ask him to be only friends and end it, Leia. Luckily he also had the commitment issues trait... what is up with these sims in Moonlight Falls lol

Hey, there's a letter for Elodie from Dante Morganthe. It says: "Um, I'm not so great at writing these things (and worse at saying them) but maybe you could ask me out sometime? If you wanted to?"

Just look at this sleazeball. He even sent a love letter to Leia's MOTHER???

It's time for her to try her luck in Uni because everyone here sucks
